Hydraloop designs and produces decentralized water recycling products.
We offer a variety of smart, innovative water recycling products for residences,
commercial real estate, hotels, lodges and more

ACT WISE
USE WATER TWICE

The easiest way to recycle water is to clean it
right where you use it – decentralized.

Hydraloop collects, cleans and re-uses
the water from showers, baths, washing
machines, handbasins and air conditioning
units. Hydraloop water is clean, clear, safe,
and disinfected. It can be re-used for toilet
flushing, washing machines, garden irrigation
and topping up swimming pools.

Hydraloop uses a unique combination of
sustainable water treatment technologies
that ensures the highest water quality and
creates a sustainable future.

We offer turn-key products and made-to-
measure solutions for projects of any size.
With Hydraloop, you give water a second life.
Together, we drastically reduce the world-wide
water consumption.
