Sustainability, Eco-design & Smart Energy

The Hydraloop is a first of its kind in the world: an award winning, compact and game changing residential water recycle system. With a Hydraloop you recycle shower, bath and optionally washing machine water so you reuse up to 85% of total in-house domestic water. It offers an excellent and certified water quality so the water can be reused for toilet flushing, washing machine, garden or pool. The Hydraloop is a true consumer product that is stylish and uses patented and breakthrough technology. It is a self cleaning, fit & forget turn key product requiring very low maintenance. The Hydraloop reduces water consumption with 45%, sewage emission with 45%, carbon footprint with 6%, energy consumption in regions with cooler winter climates and reduces water and energy bills.
